Get your business up to speed

All new features in Sage 100 and Sage 100c 2017 help you keep pace with market changes.

Improve your cash flow and increase customer satisfaction with new technology and flexible payment options. Here's what you can expect from the newest release of Sage 100 and Sage 100c 2017.

Credit card verification

Skip the tedious process of collecting names, credit card numbers, and security codes. Sage 100 and Sage 100c 2017 give you the ability to import stored commodity codes, so it's easier to track items added to a sales order and save time on every payment you process.

ACH cash receipts

Offer your customers flexibility and get faster access to your funds by accepting ACH transactions and electronic checks. ACH payments also provide you with immediate failure notifications, so you know right away if you're not getting paid.

In-product chat

Quickly and efficiently get the help you need by chatting with a customer support specialist in product, in real time. They can even send you helpful links through a user-friendly chat interface.

Sage Intelligence update

The Sage Intelligence report utility tool, which is included with Sage 100c, helps you increase productivity and create financial reports with new, downloadable reporting templates.

Simplified user experience

Sage 100 2017 includes improvements to reporting fonts, file-based navigation, ribbon-style search capabilities, and a modernized "What's New" content area. It also helps you find what you need more quickly with search capabilities enhanced with role maintenance, autofill, and full-text search.

Get a more comprehensive view of your business.
